

Supplementary Fig. 3. Histopathologic changes in the adrenal glands. (A) Normal adrenal gland. (B) A adrenal cyst (*) with a diameter of 0.8 cm was observed between the adrenal capsule and the cortex. Mild adrenocortical hyperplasia (arrows) was also observed. Compared to (C) the normal adrenal gland cortex on the opposite side, (D) the adrenal gland with a cyst showed the extended adrenal cortex due to adrenocortical hyperplasia. H&E, scale bars: (A, B) 5 mm, (C, D) 500 μm.
